How To Access the vLab

Installation (You only need to do this once)
1. Download the View Client from the download page:
   http://vlab.heinz.cmu.edu
   Note: We do not support Local Mode. Do not download the version with Local Mode.
2. Double click the file you downloaded.
3. The VMWare View Client installer will start. Accept the license and the default custom setup.
4. For the Default Server, type: vlab.heinz.cmu.edu
5. Click the Next button a few times then the Install button. When the installer is complete, click the Finish button.
6. Restart your computer

Accessing the vLab
1. Click Start -> Programs -> VMWare -> VMWare View Client
2. The VMWare View Client application will start. In the Connection Server field type, vlab.heinz.cmu.edu
   Click the Connect button
3. You will see a warning about not saving data to the virtual computer. Click OK.
4. The Login screen will appear.
5. The Available Desktop list will appear. Select the desktop you want to use. Click the Connect button.
6. The remote desktop application will open and connect you to the vLab computer desktop.
